PROFESSIONAL EXPERIENCE

ASU Learning Enterprise | Tempe, AZ
Strategy, Graduate Assistant August 2025 – Present

- Diagnosed UX limitations in 2 legacy Visual Basic simulations and engineered modern, responsive web dashboards using Claude AI, eliminating software dependency and modernizing the experience for 100+ students.
- Conducted market research to evaluate program and course portfolio opportunities, translating findings into concise executive summaries that informed leadership decisions on new offerings aligned with emerging market demand.

Dassault Systèmes | Pune, India
Business Process Analyst February 2022 – July 2025

- Led end-to-end Product Development Lifecycle of a global HR digital platform, defining requirements & user stories, partnered with cross functional teams, tracked adoption, delivering ~2M USD in annual cost savings.
- Mapped end-to-end development operations workflows and presented rollout optimization plan to senior leadership, securing approval for centralized tracking & automated communications that improved planning efficiency by 85%.
- Reduced user-reported issues by 80% by analyzing consumer behavior & support ticket trends, identifying root causes, and partnering with UX to improve workflows and overall user experience.
- Translated customer insights into clear technical concepts (PRDs) supporting roadmap prioritization and enhancing application capabilities by 40%.
- Leveraged AI tools to streamline documentation, ticket summaries, and QA artifacts, reducing turnaround time and improving team productivity.

Ubisoft Entertainment | Pune, India
Quality Assurance Specialist August 2020 – February 2022

- Collaborated with Product, Design, and Engineering teams across planning, launch, and post-launch phases to ensure high-quality releases for global Gaming title launches.
- Structured platform-specific test cases and defect logs, improving coverage transparency and accelerating release validation cycles across console and PC segments.
- Standardized testing processes and led team workshops to improve risk identification, increase sprint efficiency, and support consistent product quality.
